

RONER R

80016 RONER R

Solid and stable of all its components. It has a 4-digit display that indicates temperature and time. With countdown timer. High precision thermoregulatory heating. Circulation fan. Working depth max. 16.5 cms. Optimized operation up to 50lt. Working temperature between 40°C and 115°C with a precision of +/- 0.3°C. All its components are made of AISI 304 stainless steel.

Technical data:

- Robust & stable components.
- 4 digit display for temperature and time.
- Countdown timer.
- Circulation pump for homogeneous temperature.
- Max working depth of 16,5 cms.
- Optimal operation up to 50 litres.
- An operating temperature of between 40 and 115o , at a precision of +/- 0,3C.
- A motor circuit breaker that detects overvoltage and overheating.
- It was made entirely of AISI 304 stainless steel to ensure hygiene and resistance to acids and salts, as well as excellent resistance to oxidation.
- Power : 2000w. - 230v/50Hz.

Format

Measurements: 21 x 11 x 10 cm

Packaging measurements: 45 x 34 x 25 cm

Weight: 5 Kgs.

Customs code: 8516.10.80

EAN: 8436537860121
