

# RONER

## 80013 RONER

Coinciding with the 15th anniversary of the launch of the first Roner, we have simplified the range while improving its performance and functionality. Easy to use, robust and reliable, from 5°C to 150°C, it has a powerful circulation pump with a flow rate of 10l / min which ensures a constant and precise temperature throughout the container. Accuracy of 0.1°C, 50 liters. Easily removable protective casing for good cleaning.

## Technical data

- Temperature measure in real time
- Constant visualization of temperature
- Display resolution: 0,1°C
- Alert limit below/behind temperature
- Message of low water level
- Message of heating
- Automatic calibration
- Maximum volume : 20 lts.
- Fixation: Support supplied with the equipment
- Minimum immersion for fixation to container : 14 cm.

## Format

Package measurements: 35 x 24 x 25 cm  
Weight: 4 Kg

Customs code: 9032.10.20

EAN: 8436537860091
