It is a professional frozen food processor. With an attractive and compact design, it turns frozen food into an ice cream, sorbet with the perfect texture and temperature. The process can be done, without defrosting all the content, being able to program and process only the amount that we will use later. Obtaining a unique texture is the result of the advanced design of the blades, a powerful new brushless motor that rotates at 2000rpm together with a high pressure air circulation system.

**Technical data**

- Size: 39.5x19x47.5 cm
- Weight: 18 kg
- Sturdy aluminium body
- Professional brushless motor 1000W
- Faster and silent
- Removable tray which simplifies extraction of beaker
- Easy-to-clean main spindle
- Selection of portions to avoid food waste
- Single or double processing button

**Included accessories**

- 2 stainless-steel beakers with lid, marked for 10 portions
- 1 blade
- 1 active carbon air filter
- 1 jar holder with sealing lid

**Format**

Packaging measurements: 51 x 30 x 57 cm
Weight: 18 kg

**Customs code**: 8509.40.00
**EAN**: 8413234260123
