

PROFIWHIP SIFONS

PROFIWHIP SIPHONS

The iSi ProfiWhip siphon is a cream whipper to which air is incorporated through compressed air capsules. Thanks to this simple principle we can turn almost any mixture into a foam, into a sweet or salty cold foam. Everything consists of filling the siphon with the desired mixture, screwing on the head, loading it with the N₂O capsules, shaking it, letting it rest in the refrigerator and our foam will be ready to be savored.

Technical data

- Only for cold preparations.
- Body and head made of stainless steel.
- Maximum capacity 0,5 lt and 1lt
- Sealed temperature resistant silicone with pull tab Removable head for better and easier hygiene.
- Includes decorators with stainless steel screw
- Dishwasher safe
