

PROFESSIONAL CHARGERS

PROFESSIONAL CHARGERS

The new professional chargers substantially improve the performance of the old ones. The new professional chargers contain more gas in practically the same volume as the old chargers, with a consequent increase in pressure and improved performance in volume. The higher performance of the new professional chargers means that from the same amount of liquid that we introduce in the siphon, we obtain up to + 20% in volume, with the consequent savings in product.

Technical characteristics

- Each cream charger contains contains 8,4 grs. N2O.
- 100% high quality Stainless Steel
- Individually weighed electronically with filling warranty
- +12% N2O in practically the same volume.
