

BIODEGRADABLE VACUUM BAGS

EUA 218121 BIODEGRADABLE VACUUM BAGS

Vacuum sealing helps reduce food waste, actively contributing to environmental protection.

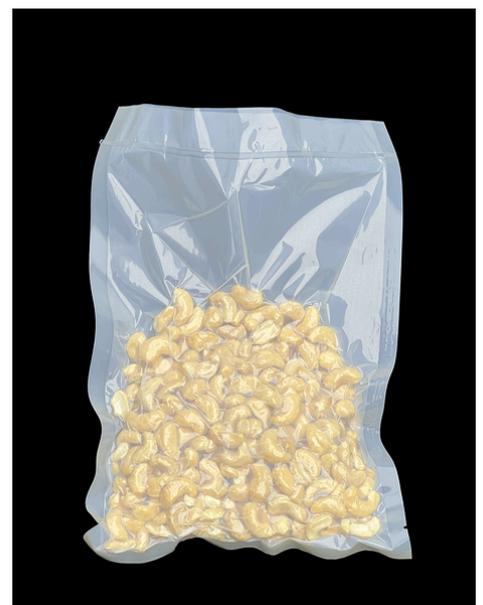

By using biodegradable vacuum sealing bags, this commitment is further reinforced.

These bags are free of toxic chemicals, biodegradable and compostable, offering a responsible alternative in line with a more sustainable kitchen.

Features

- Food packaging and storage
- Vacuum cooking
- Sustainable and safe
- No toxic chemicals (BPA-free)
- Compostable
- Resistant to wear and tear and punctures
- Materials: PLA + PBAT
- Thickness: 75 microns
- Temperature range: -30 °C / +100 °C
- Cooking time: 22 hours at 90 °C
- Sealing temperature: 118 °C - 125 °C
- O₂ trans. rate: 0.1 cm³ / (m²·24 h)
- Vapour trans. rate: 13.8 g/(m²·24 h)

Format

Dimensions: 30 x 20 cm

Pack of 100 units

Master Box 12 packs

EAN: 5031192734553
